International Exchange Workshop of Architecture and Urban Design pursues vision of architecture and urban design for Asian cities. In the 2012 program, Shibaura Institute of Technology (SIT) Department of Engineering and Design and Chung-Ang University (CAU) School of Architecture and Building Science joined studying revitalization of Seoul downtown. The workshop proceeded through three stages. In the first in May to July, SIT learned architecture, urbanism and culture of Korea and Seoul, while CAU collected information on Euljiro Street as the workshop site. The second and main stage was a session on 8th-12th August in Seoul. Nine SIT and eleven CAU undergraduate students stayed at Chung-Ang University, working on projects, visiting Seoul city and discussing with visiting lecturers. In the final stage, each team developed projects at home, held a tele-presentation by Internet on 31st August. We SIT greatly appreciate collaboration with CAU including Prof. Jung Hyung Lee, Dr. Bo Ram Lee, teaching assistant, Prof. Young Tark Kim, Dean of Graduate School and the students, and hope the academic exchange to develop year and year. We also thank to Mr. Yoichi Nishikawa for his contribution to our international education.

SIT professors: Michihiko Shinozaki and Hidetoshi Maeda

CAU professor: John Hyung Lee
