Tokyo-Seoul Skype, 2014

International Exchange Workshop of Architecture and Urban Design began in 2012 between Shibaura Institute of Technology (SIT) Department of Engineering and Design, and Chung-Ang University (CAU) School of Architecture and Building Science to pursue vision of East Asian cities. The Workshop held the first program 2012 summer in Seoul and the second 2014 summer in Tokyo. SIT eight and CAU eight students worked together at SIT in Tokyo, August 21-29, 2014. The 2014 workshop worked on Shibaura District neighboring SIT in Minato Ward between the CBD and waterfront of Tokyo. 'Minato' says a port in Japanese and Shiba-ura means area behind Shiba District. Its landscape is dynamic mixture of business development, high-rise condominiums, traditional streets and industrial sites in canal web. Asian cities changing find within the heart such transitional areas potential to contribute urban diversity. Four groups respective of SIT two and CAU two students found blocks adjacent to canals as their working site, completed concepts and master plans during Tokyo session August 21-29, and later developed schematic designs at home till the Internet presentation between Seoul and Tokyo on September 27.

SIT professors: Hidetoshi Maeda, Michihiko Shinozaki, Taizo Taniguchi, Hitoshi Kuwata and Yuko Onari
CAU professor: John Hyung Lee
